Islamabad, Pakistan

EDUCATION

BS Artificial Intelligence
COMSATS University Islamabad
2023 – 2027

CORE SKILLS

Edge AI: Raspberry Pi 5, Hailo-8L, INT8 Quantization

AWS, Kubernetes, Docker, Jenkins CI/CD, Prometheus, Grafana

YOLO, ByteTrack, CNN, LangChain, RAG, HuggingFace Transformers

Python, Flutter, Flask/FastAPI, PyTorch

FOCUS AREAS

- MLOps & Cloud Engineering
- Computer Vision & Edge AI
- Backend & Mobile Development

PROFILE SUMMARY

BS Artificial Intelligence student at COMSATS University Islamabad with hands-on experience building edge-AI computer vision systems, end-to-end MLOps pipelines, and cloud-native applications on AWS.

PROFESSIONAL EXPERIENCE

AI Engineer Intern (VC Technologies) Jun 2026 – Aug 2026 · Islamabad

- Trained a YOLOv8n smoke detection model (secondary fire class) on merged public datasets, reaching 0.832 mAP50 on smoke; INT8-quantized it to Hailo *.hef* and deployed on Raspberry Pi 5 + Hailo-8L at 107 FPS.
- Trained a door open/closed detector (YOLOv11s) on a self-captured and public dataset, reaching 99% AP50-95, deployed on Raspberry Pi 5 + Hailo-8L.
- Built a real-time door-monitoring pipeline: YOLO11n + ByteTrack IN/OUT counting, Streamlit dashboard, event logging and screenshot evidence capture.
- Built a face recognition attendance system (SCRFD detection, ArcFace/MobileFaceNet embeddings, Hailo tracker) with an enrollment dashboard and known/unknown CSV logging.
- Applied LangChain and RAG pipelines across multiple internship projects.

PROJECTS

Self-Healing MLOps Pipeline (course project)

AWS EC2 · Kubernetes · Jenkins · Prometheus · Grafana · DistilBERT

- Deployed a Flask sentiment analysis API (DistilBERT) via blue-green Kubernetes on Minikube with a 6-stage Jenkins CI/CD pipeline.
- Built a custom Prometheus exporter for prediction confidence; Alertmanager auto-triggers a Jenkins rollback with zero human intervention.

FocusQuest StudyLens — AI Study Behavior Analyzer

MediaPipe · YOLOv8 · CNN · Flutter · WebSocket

- Built a real-time study analyzer using MediaPipe (drowsiness), YOLOv8 (phone detection), and a custom CNN at 98.5% accuracy.
- Built a Flutter + WebSocket dashboard with gamification and multi-face classroom tracking.

MedLumina — Medical AI Pipeline

LangChain · Gemini · ChromaDB · FastAPI · OpenFDA

- Built a RAG medical pipeline: symptom → OpenFDA lookup → LangChain + Gemini explanation → interaction checking → ChromaDB search.

FYP — Explainable Chest X-Ray Classification

RAG · Concept Bottleneck Models · Explainable AI

- Building a RAG-based chatbot module and a Concept Bottleneck Model to improve explainability of chest X-ray classification.
